

# Phase 2

Team IceBucket

# Why Choose THEIA

THEIA does not offer a single solution for indoor navigation for blind people, however, it greatly enhances the experience by offering multitude of features for both caretakers and users.

THEIA is cheap and easy to set up and use compared to existing solutions.

THEIA is more feature rich compared to other solutions, and is capable of accommodating for sight, and hearing.

# Creeping Rate

Our previous estimate creep rate begging number of FPs: was 94 and Estimated end number of FPs: 144

Creep Rate:  $((144-94)/94/2)/5 = 5.2\%$  per team member

This estimation was fairly reasonable

Upon finishing development of the prototype, the effort put into implementing data functions and transactional functions were accurate to the estimations.
